### 5. Waste Minimization Statement

#### **Efforts Undertaken:**

Glencore Recycling has been involved in the recovery of precious metals for over 35 years. Our principle mission continues to be the acquisition of feedstock for Glencore's Horne primary copper smelter, located in Rouyn-Xstrata, Quebec.

2

Glencore Recycling has waste minimization program to reduce the amount of wastes sent to TSDF's for treatment and disposal within the United States.

No practical alternative to the use of the air pollution control equipment which generates baghouse waste has been identified.

**Results Achieved:**

The quantities of waste shipped by Glencore Recycling are variable since some materials were generated off-site by third parties, and others are dependent on infrequent maintenance activities.

**6. Certification**

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment.
